

# CV-7600 Series - BLE

# App & Credential Set-up

CV-7600 Series mobile-ready readers combine Bluetooth Low Energy (BLE) & contactless smart card technologies.

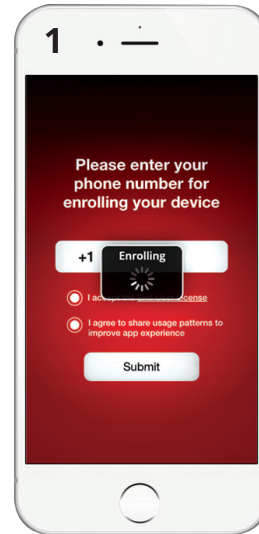

Via the Conekt™ Wallet App, your Android™ or Apple iOS™ smartphone becomes a secure access control system credential using BLE technology.

CV-MBT : Package of 10 Mobile Credentials purchased through Camden Door Controls.

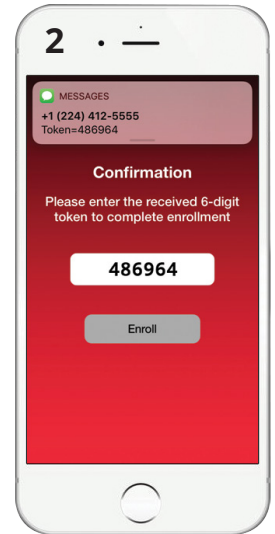

## Installation

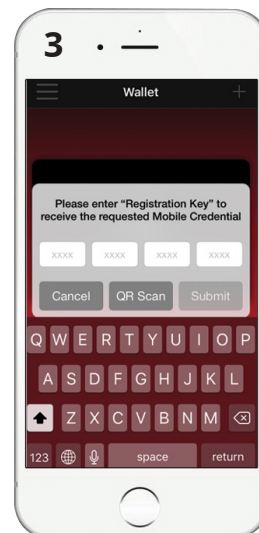

Prior to set-up, download the Conekt™ Wallet App via the Apple Store or Google Play.

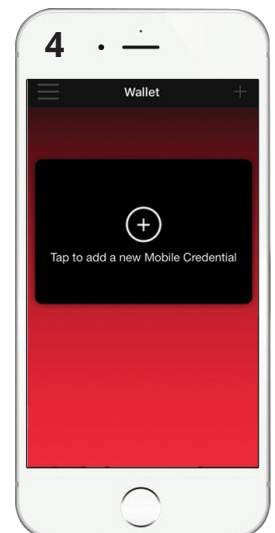

1. Open App and enter your mobile number.

2. Enter token code sent via text message.

3. Enter your purchased Mobile Credential (CV-MBT)

4. Optional: Add multiple credentials on the same device

## After Installation

To enter an area, open app, select credential and place phone within read range of the card reader - varies by model. Once scanned, the door opens.
