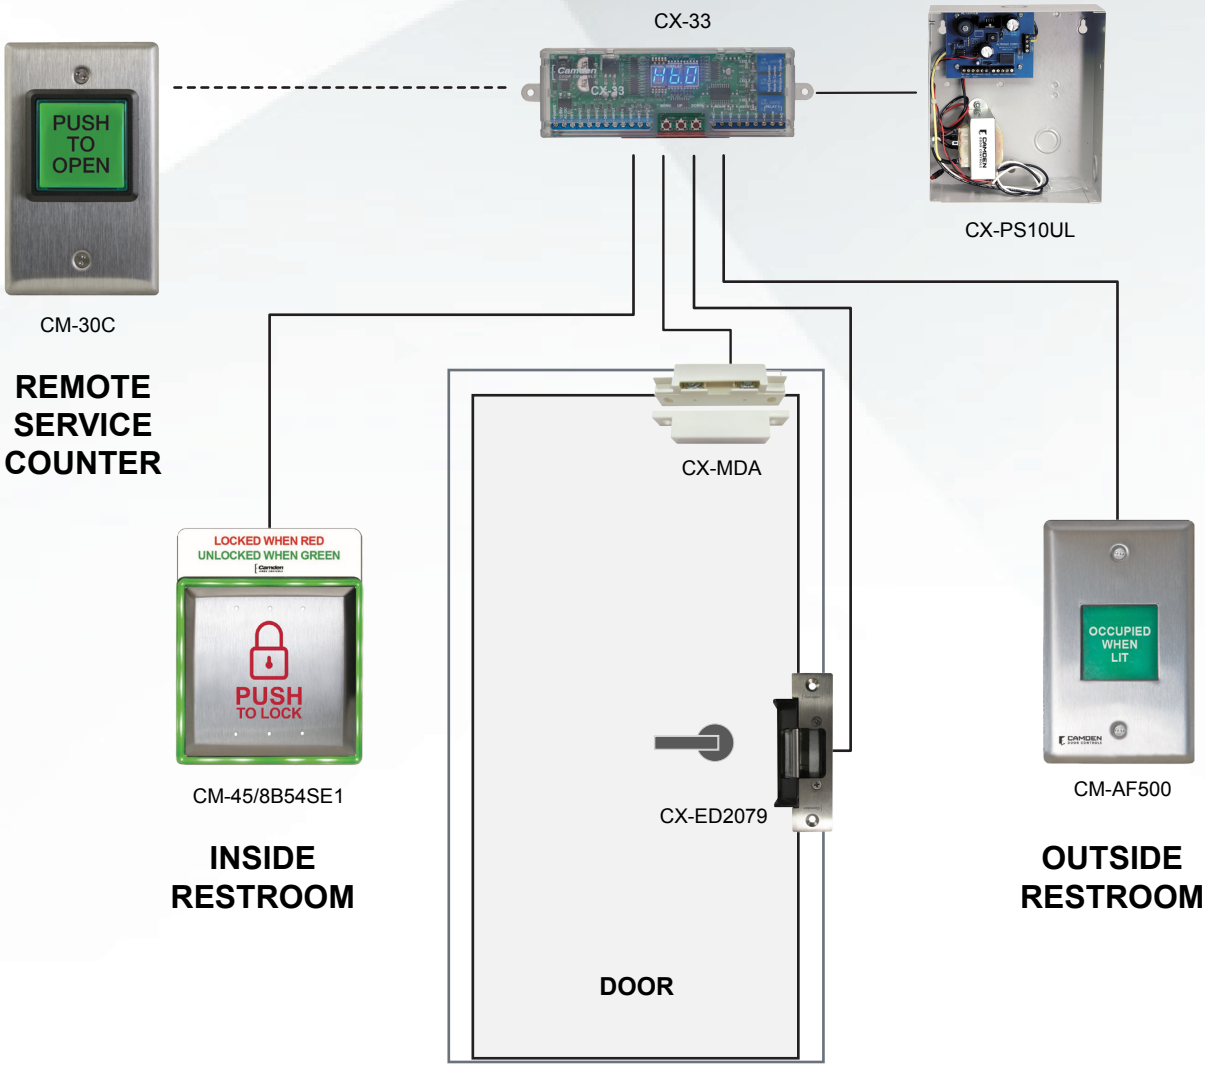
ACCESS CONTROL (SECURITY)

Remote Door Release



Secure Restroom – Wired

Designed for gas stations and other applications where access to a restroom is controlled. This is a normally locked restroom control system, without an automatic door operator, that is unlocked remotely by an attendant, by pressing a push button.

FEATURES

- A complete application, including all activation, locking and control devices
- 'Occupied' and 'Locked Door' annunciation
- Programmable door hold open time.
- High quality devices with 3-year warranty
